

Self-bearing countertop in white Cristalplant® biobased without side panels
 AEVOB0_

Benedini Associati, 2011

The countertop in white Cristalplant® biobased is a large washbasin with single inclination; it can be rested on the storage units or with concealed wall fixings.

Finiture

White

Materiali

Cristalplant® biobased

The countertop in white Cristalplant® biobased is a large washbasin with single inclination towards the drain, positioned near to the wall and not visible. Evo-E2 can be rested on the storage units or with concealed wall fixings: the version with concealed wall fixings is ALWAYS without side panels, whereas the version to be rested on storage units is available without side panels for niche compositions or with side panels in the same finish as the top. Taps can be wall or top mounted. The countertop can be fitted with shelves that can be positioned freely all over its length. Each countertop has to be fitted with at least one shelf. The deviation from the storage units' modularity is absorbed by the buffer elements.
